

LETTER OF RECOMMENDATION

For Devesh Mishra

To Whomsoever It May Concern,

I am pleased to strongly support Mr. Devesh Mishra, a B.Tech Chemical Engineering student at VNIT Nagpur, who worked under my supervision as a research intern during the summer of 2026. Devesh contributed to the project Circular Angul for the Angul district, Odisha, focusing on circular-economy pathways for industrial waste.

During his two-month internship, Devesh exhibited exceptional maturity, technical depth, and self-direction by supporting in tackling three major waste streams in a heavy-industrial region:

1. **Plastics Workstream:** He developed a comprehensive portfolio of nine detailed research proposals (including plastic-modified bitumen roads, recycled paver blocks/drain slabs, plastic lumber/formwork, public/school furniture, rPET textiles, HDPE/PP bins, plastic-fly ash panels, chemical recycling feedstock, and food-grade rPET packaging). Each proposal featured quantified feasibility scores, indicative budgets, roadmaps, and regulatory assessments. Notably, he displayed intellectual honesty by objectively reporting unfavourable feasibility where data warranted it (e.g., food-grade packaging).
2. **Fly Ash Workstream:** He contributed to drafting a thorough literature review which analyzed the issues and their potential solutions on fly ash brick manufacturing.
3. **Waste Tires Workstream:** He formulated a practical, four-route conversion model (retreading, crumb rubber, rubberized roads, and public-use products) complete with process details and machinery requirements.

Devesh stands out for his rigorous, data-driven analysis and impeccable work ethic. He consistently met deadlines, proactively integrated feedback, and required minimal oversight. His excellent communication skills allowed him to present complex engineering concepts clearly to policy and administrative stakeholders. Furthermore, as the founder of his own circular-economy venture, "ECONE", he brought an invaluable, practical passion for sustainability and materials science to the project.

Devesh combines top-tier analytical skills with discipline and mature professionalism. I recommend him for any academic or professional endeavor.

Yours sincerely,

Prof. Anju Singh,

PhD (Env. Sci. & Engg.), IIT Bombay,

Professor and Coordinator, Centre for Sustainability Management, IIM Mumbai,

Powai, Mumbai - 400087.
